

# Engine Block Washers

FMT Engine Block Cleaning Systems provide effective part cleaning and drying to meet your production cleaning requirements.

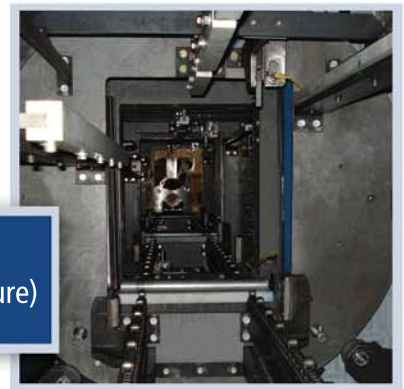

Visit us online: [www.fmtinc.com](http://www.fmtinc.com)

Choose from one of FMT's standard lines, modify one of those units, or work with FMT on a custom engineered design to meet your engine block cleaning needs.

- Some examples of block sizes cleaned using the FMT Block Washers include 4 and 6 cylinder aluminum automotive blocks; 6 to 16 cylinder cast iron diesel engine blocks; custom systems are available.
- Some of our add-on options include custom zero-degree nozzle header arrangements, block rollover, oil separation, and automatic chip removal.
- Single or multiple stages are available, including washing, rinsing, rust-inhibiting, and drying.
- FMT recommends rugged stainless steel tanks and enclosures to provide superior durability, chemical resistance, and quality appearance.
- Load your engine blocks manually or let FMT manufacture an automatic load and unload system for your block washer.
- Block cleaning systems can be equipped with all popular heating systems including electric, steam, and natural gas heating.
