FMT, Inc. Rotary Basket Washers provide effective part cleaning and drying, and are customizable to fit your production-specific needs.

Choose from one of FMT's standard lines, modify one of those units, or work with FMT on a custom engineered design to meet your parts cleaning needs.

- Rotary Basket Systems are best suited for batch, precision and ultrasonic cleaning.
- Some examples of parts cleaned using the FMT Rotary Basket include cast aluminum fuel pumps, industrial/commercial electronic parts, stampings, components for heavy equipment, hydraulic valve bodies, aluminum castings, engine components, and bulk machined parts.
- Available in single-stage or multi-stage configuration to suit virtually any type of cleaning application.
- Multi-stage configurations include spray/immersion wash and rinse, line rinse and dry, ultrasonic wash and rinse, rust-inhibiting, oil separation, and additional wet stages.
- With the integration of Ultrasonics, the FMT Rotary Basket System can achieve precision cleaning specs not available via other applications.
- Standard FMT Rotary Basket Systems come in 2, 4, 6, and 8 basket capacities (custom available).
- The rotating basket fixture can be designed to accommodate a wide variety of part sizes and geometries using standard or specially designed baskets.
- Systems can be equipped with all popular heating systems including electric, steam, and natural gas heating.
