Findlay Machine & Tool • 2000 Industrial Drive • Findlay, Ohio 45840 • 419-422-0768

When it comes to mechanical services and machine shop work, FMT offers everything you need to get your job done on time and on budget.

With over 130,000 sq. ft. of space dedicated to meeting your needs, it's no wonder why we are the preferred provider of these services for some of the most demanding companies in the region. We are ISO 9001:2000 certified, offer sub-assembly production, and also have a 100 ton and a 25 ton crane on site.

A reliable source in the machine and tool industry to get the job done on time and on budget.

Some of the local turnkey solutions we offer are:

- Fabrication (all scales of projects)
- Mechanical (new, repair, refurbish)
- Electrical (all types)
- Instrumental
- PLC Programming
- Piping
- Rigging, Millwright
- In-Plant Maintenance Support
- Certified Welders (Carbon and Stainless Steel)
- Engineers (Process, Mechanical, Electrical, Chemical, Industrial, and Project)
- Machine Shop

Our machine shop is ideal for short production CNC milling jobs, repairing damaged tooling, and reworking machine parts. We have a full range of machines to meet your needs, including:

- Bridge Ports
- Manual Lathes
- CNC Lathes
- CNC Mills
- Boring Mills
- Surface Grinder
- Vertical Machining Center

Local Services

Jeff Freshour knows from experience that FMT is committed to 100% Customer Satisfaction:

"Over the past 6 years we have depended on FMT to provide us with a wide variety of services to keep our facility operating as the world's largest producer of crank shafts. From supplementing our own maintenance staff to developing and installing custom-engineered projects, we know that FMT will deliver.

One project stands out in particular. During one of our busiest times of the year, we ran into an emergency situation. We needed to quickly have our 10" cooling lines rerouted and upgraded with valves without taking the system down. FMT decided that the best solution was to utilize their freeze technology and was able to complete the job and have us up and running without losing any valuable production time. I honestly don't know of anyone else who could have handled this project the way they did.

Regardless of our needs, large or small, we know that FMT will deliver -- often times exceeding our expectations."
