Plastic Injection Mold Maintenance and Repair

Plastic injection tooling requires regular maintenance and repair to maintain high part quality and improve the longevity of your tooling investment. FMT offers mold and tool maintenance and repair services designed to consistently deliver high quality parts and long tool life while minimizing production downtime.

With over 30 years of industry experience in both advanced machining and plastic injection molding, we offer a diverse complement of services to the plastic injection molding industry.

OUR SERVICES INCLUDE:

- Inspection, tear down and preventative maintenance
- Complete preventative maintenance program, based on part volume—monthly, quarterly, or annual options
- Tool revisions to improve molding condition, increase production efficiency, and tool capabilities
- Tool troubleshooting and testing on our modern injection molding machines
- Repairs to neglected, worn or damaged tooling
- Tool transfer and storage service
- History and documentation

OUR CAPABILITIES INCLUDE:

- 3D CAD modeling
- CNC milling
- CNC turning
- Precision grinding and polishing
- Certified welding and metallurgy
- Hydraulic flow testing
- Molds up to 100,000lbs
- 120,000 square foot machining and manufacturing facility
- Hauling capabilities up to 30,000lbs
